

Banas Porcelain®

redefining PORCELAIN

engineered for extreme climates

PORCELAIN COLLECTION

our commitment

LONGEVITY

Our newly expanded globally-sourced porcelain pavers offer exceptional durability, superior impermeability, and high load-bearing strength. Enjoy a newly expanded assortment of colours and textures that will heighten every aesthetic. The UV-resistant surface maintains its aesthetic appeal while standing up to salt, harsh weather, and stains—unlike more porous stone options.

SUSTAINABILITY

Eco-Conscious Innovation – Crafted with up to 90% recycled content, our porcelain pavers redefine sustainability.

Environmentally Responsible – Designed with eco-friendly construction, minimizing harmful emissions for a greener future.

NOTE: all printed materials and representational swatches are intended for general reference only. Variations in color, tone, texture, and finish may occur due to printing processes, lighting conditions, and material characteristics. As a result, the appearance of pavers in this catalogue may not be an exact or 100 percent accurate representation of the actual stone. For the most reliable assessment, we recommend reviewing physical samples prior to final selection or installation.

Built for 
**NORTH
AMERICAN
CLIMATES**

From scorching summer heat to icy winter conditions, North American weather can be demanding and your outdoor materials should be ready for it. Banas Porcelain pavers are engineered to perform in every season, maintaining their beauty and integrity year-round. Their ultra-low water absorption rate (less than 0.5%) makes them highly resistant to freeze-thaw cycles, preventing cracking, spalling, and moisture damage even in the harshest winters.

Porcelain's dense, durable structure stands up effortlessly to UV exposure, heavy rain, humidity, and extreme temperature swings. Unlike many natural stones, it won't fade, crack under extreme pressure, or stain, ensuring your outdoor spaces remain vibrant and stable season after season. For homeowners across North America from coastal climates to snowy regions porcelain pavers offer a reliable, long-lasting solution built to withstand whatever the weather brings.

GRANDE RANGE

Crafted for modern outdoor living, the Grande Range delivers refined style, exceptional durability, and design flexibility.

Its large-format porcelain slabs create seamless, contemporary spaces ideal for patios, walkways, and pool surroundings.

With six timeless colours and multiple sizes every surface becomes a statement of clean sophistication.

Banas Porcelain®

redefining PORCELAIN

ANTRACITE

Bold and contemporary, Antracite Grande Range features deep charcoal tones and subtle stone-like texture for a refined, modern look. The large-format pavers create clean, expansive surfaces with minimal grout lines perfect for sophisticated patios, walkways, and urban outdoor living spaces.

Its textured finish enhances authenticity and pairs seamlessly with natural stone elements, delivering a strong architectural presence in both modern and transitional landscape designs.

Durable and easy to maintain, Antracite can be cleaned effortlessly using a pressure washer and Banas Floor Shampoo.

NOCE

Low
MAINTENANCE

High
PERFORMANCE

Enjoy beautiful outdoor spaces without the upkeep. Banas Stones porcelain pavers are designed for homeowners who want premium style with minimal effort. Their non-porous surface naturally resists stains, spills, and dirt, making cleaning as simple as a quick rinse. Unlike many natural stones, porcelain never requires sealing, polishing, or special treatments—its colour and finish remain intact year after year.

Engineered for strength, these pavers excel in high-traffic areas and stand up to everyday wear, weather changes, and busy family living. They won't fade in the sun, absorb moisture, or deteriorate over time, even around pools, BBQ zones, or entertaining spaces. With unbeatable durability and virtually no maintenance, porcelain pavers offer long-lasting performance that allows you to enjoy your outdoor space—not work on it.

Elevated ENTERTAINING SPACE

Create an outdoor environment designed to impress. With rich textures and refined finishes, Banas Stones porcelain pavers provide a sophisticated foundation for gatherings of every kind. Their high-end appearance brings warmth, depth, and modern elegance to your space—whether you're hosting intimate dinners under the stars or lively celebrations by the pool.

What sets porcelain apart is its exceptional performance. Unlike natural stone, porcelain is non-porous, highly durable, and resistant to stains, fading, and moisture, ensuring it looks pristine even after heavy use. It stands up effortlessly to spills, weather changes, and everyday wear, making it the ideal choice for outdoor entertaining spaces that need to be both beautiful and low-maintenance.

Paired with stylish furniture, ambient lighting, and thoughtful landscaping, these pavers transform every occasion into a memorable experience—turning your outdoor area into a true extension of your home's hospitality.

Timeless Beauty of PORCELAIN STONE

Crafted to mirror the elegance of natural stone, our porcelain pavers deliver a timeless aesthetic refined through the precision of modern engineering. Each piece is designed with remarkable stone realism fine veining, subtle tonal variations, and authentic surface texture that bring depth, dimension, and character to every installation. The result is a surface that feels organic and natural, yet performs with the reliability of advanced materials. These pavers effortlessly elevate outdoor environments, transforming patios, terraces, and poolscapes into serene, luxurious escapes.

Inspired by the true charm and complexity of natural stone, our porcelain pavers offer a sophisticated, high-end finish that enhances any landscape style. Each paver begins with carefully selected, purified clays that are pressed and fired at extremely high temperatures, creating a material that is denser, harder, and more resilient than most natural stones.

This exceptional durability means your outdoor space retains its beauty without compromise resisting fading, water absorption, freeze-thaw cycles, and everyday wear. It's the perfect blend of nature's aesthetic appeal and the long-term performance of next-generation porcelain.

INSTALL ON ANY SURFACE

**DRY LAY - INSTALL
ON GRAVEL OR STABLE
COMPACTED BASE**

**WET LAY - INSTALL
ON PRE-EXISTING OR
NEW CONCRETE BASE**

GRASS

PEDESTAL

Our porcelain pavers are engineered for unmatched versatility, offering seamless installation across a wide range of surfaces.

Whether you're dry-laying over a stable compacted base, setting on concrete, integrating with grass, or elevating your space with a Banas pedestal system, each method delivers exceptional stability and long-lasting performance.

Designed to adapt to any project residential, commercial, or landscape. Our products ensure a beautiful finish with minimal maintenance.

Banas Porcelain®

redefining PORCELAIN

easy to INSTALL dry, wet, grass

THE KEY TO A LEVEL INSTALL

A solid well-packed, levelled base.

DRY LAY

Porcelain pavers can be dry-laid on a gravel or HPB base, similar to other paving materials. Prepare a level, well-compacted base of 6–10 inches.

Installing a concrete-framed border helps prevent movement. The use of permanent Banas spacers beneath and between the pavers is required.

WET LAY

Porcelain pavers can be installed on a new or existing concrete base. Back-buttering the tiles with mortar eliminates air pockets and helps prevent cracking. Ensure the base is properly sloped to allow for adequate water runoff.

GRASS

For installation on grass: cut out your desired path, add a well-compacted gravel base, and set the stones so they sit level with the surrounding grass.

This installation is recommended for rooftops, balconies, and elevated decks. Pedestals create a level, elevated surface, allowing pipes and conduits to run underneath. Pavers can be easily lifted for maintenance of services below.

PEDESTAL

Flexibility to install on any surface, where digging is not possible or wants to be avoided.

Using Banas pedestals allows trades to create a level surface that is elevated. Allowing for pipes, conduit to run below the surface. Great for rooftops and any application where digging is not possible.

download our
INSTALLATION GUIDE

THE TOOLS YOU NEED

The right tools for installation and low maintenance make Porcelain a breeze!

CUTTING

To cut porcelain, use a non-segmented diamond blade and make wet cuts. The Banas Porcelain 14" Diamond Blade is a high-performance tool specifically designed for cutting porcelain and other hard tiles.
